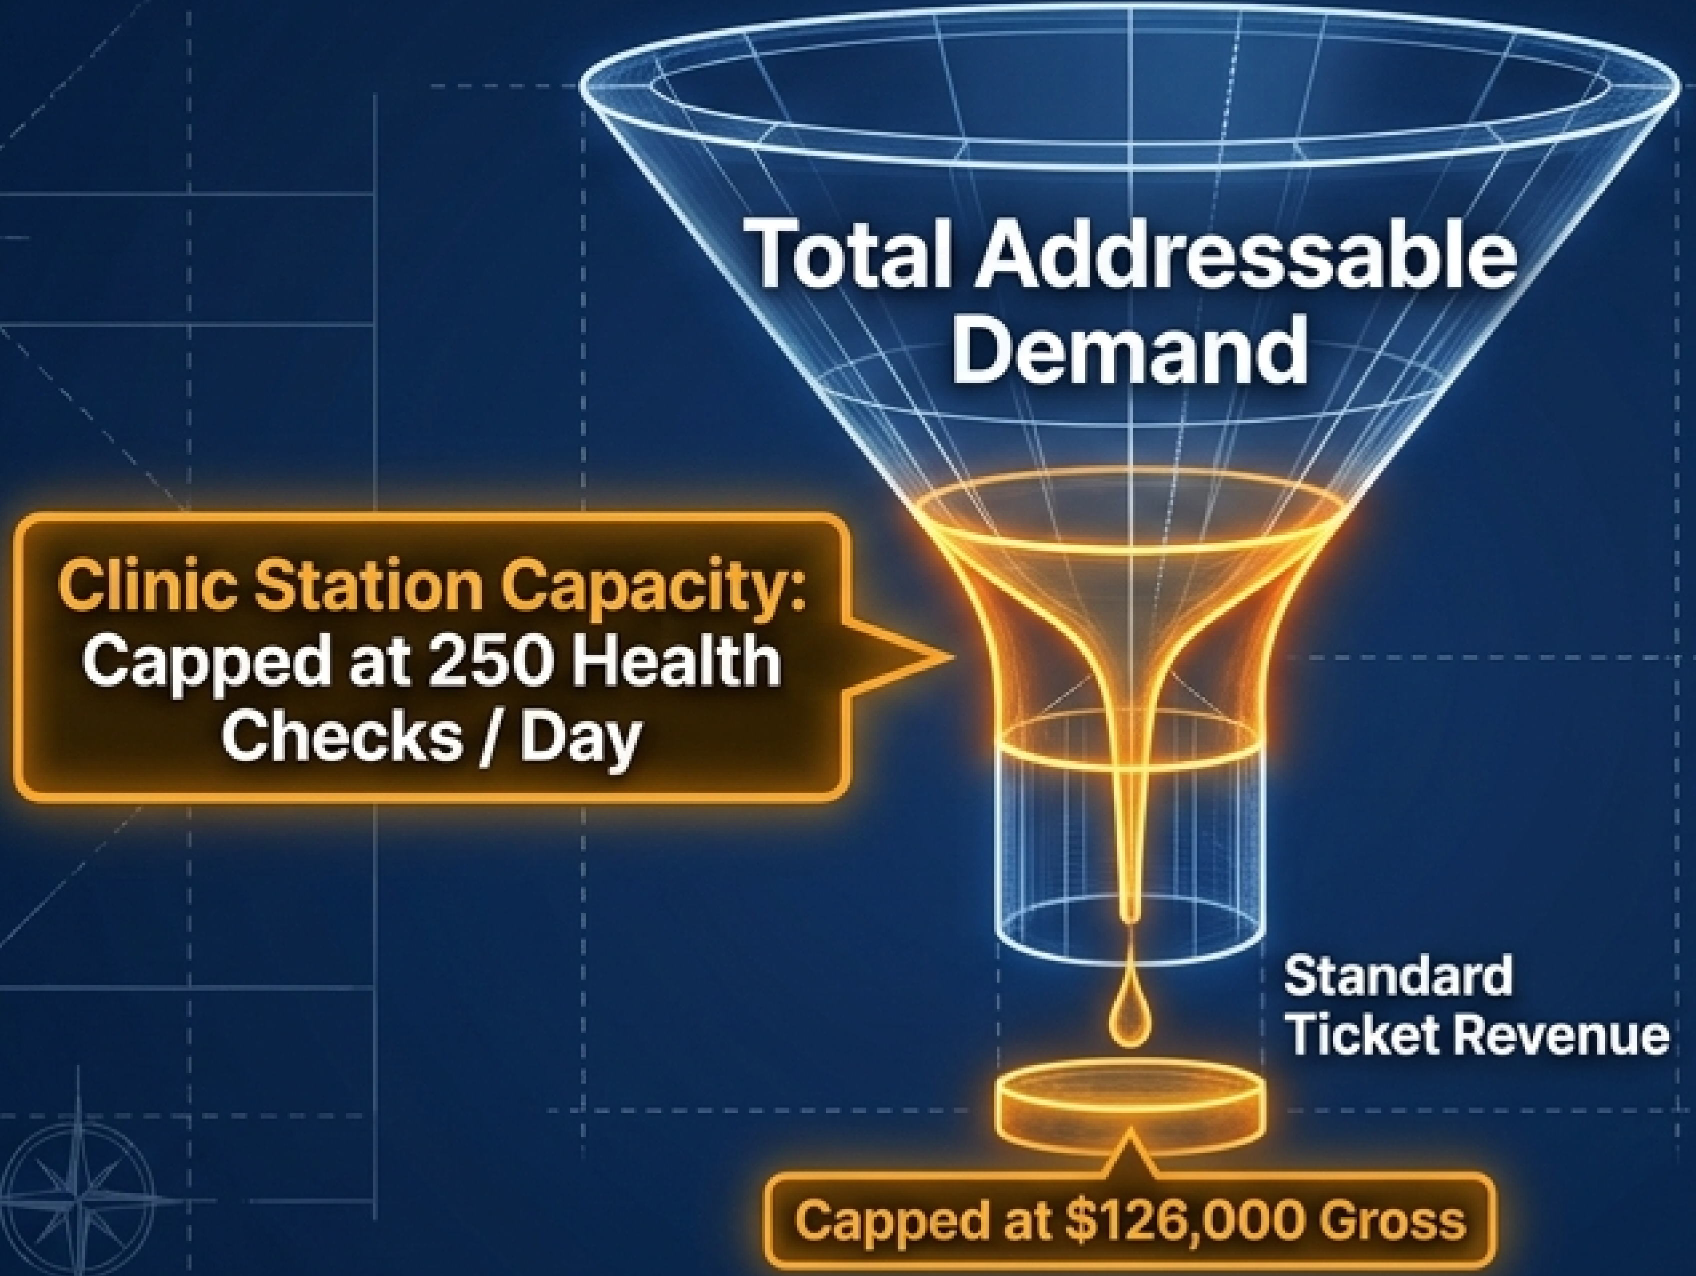
Strategic Financial Realignment

Securing Our Mission: Free Outpatient Treatment for Needy Patients

Target: $200,000 Net Surplus | **Strategy:** Optimize Capital, Scale Efficiency, Bypass Bottlenecks.

The Core Problem: The Physical Capacity Bottleneck



Goal: $200,000 Net Surplus ↗

Reality: Default execution yields a maximum $61,720 net. ↘

We cannot treat our way to $200,000 in a single day. We must change how we generate revenue.

The Strategic Pivot: A Three-Pillar Solution

Pillar 1: Capital Realignment

Repurposing idle cash reserves to fund upfront overhead without external debt.

Pillar 2: Efficiency Recovery

Slashing the historic fundraising cost ratio to meet legal and corporate standards.

Pillar 3: Strategic Scaling

Bypassing physical clinic limits via uncapped 'Pure Donations' and new premium corporate tiers.

Financial Health Diagnostic (2020 vs. 2021)

Liquidity - The Opportunity

We have a unique war chest to self-fund growth.

Profitability - The Threat

Operational overhead is growing faster than revenue.

Verdict: We must deploy our high liquidity to launch a lean, high-margin event with rigidly frozen fixed costs.

Management Insight: Capital Allocation

The Waterfall Allocation

Idle Bank Cash
$284,000

$39,000
Upfront Event Capital Allocation

Protected Liquidity Buffer
$245,000

Zero Debt	Leveraged Liquidity	Ring-fenced Risk
Avoids all external loans or financing costs.	Utilizes our inefficient 7.85x Current Ratio for active ROI.	Maximum downside strictly capped at the $39K allocation.

Efficiency Recovery Plan

2021 Historic

Costing **$0.59** to raise every $1.00.

Strategic Target

Costing just **$0.16** to raise every $1.00.

Execution Mechanics

1. Premium Corporate Tiers

Introduce $1,500 corporate packages to dramatically increase average revenue per physical attendee.

2. Uncapped ‘Pure Donations’

Introduce non-attendance ‘Supporter’ options to generate 100% margin revenue without triggering the 250-person health-check limit.

Strategic Risk Mitigation & CSR Integration

Compliance & Partnership Dashboard

Regulatory Compliance (COC)

The **16.5%** target sits comfortably below the mandatory 30% legal limit (the 30/70 rule), safeguarding our **IPC status** and ensuring absolute public transparency.

16.5%

Targeted Fundraising Efficiency Ratio

CSR Magnet

Top-tier corporate partners demand **high-efficiency** ESG/CSR investments.

Stripping away overhead waste makes We Care an **investor-ready** charity partner for major **matching gift programs**.

Side-by-Side Budget Comparison

The Scenario Matrix		
Metric	**Scenario A (Failure)**	**Scenario B (Success)**
Fixed Costs	$39,000	$39,000 (Rigidly Locked)
Gross Revenue	$126,000 (Capped)	$276,000 (Scaled)
Efficiency Ratio	51.01% (Fails)	16.5% (Optimized)
Net Surplus	$61,720	**$236,900**

By rigidly freezing fixed costs and scaling premium/pure donations, Scenario B effortlessly surpasses the $200,000 target.

Operational Optimization: Protecting the Margin

Blueprint Schematic

Volunteer Deployment

Reassigning our 5 regular volunteers to directly replace paid administrative and event staff.

Tiered Labor Hours

Utilizing variable, tiered labor scheduling instead of flat-day contractor rates to eliminate "Financial Leakage" during off-peak hours.

Fixed-Cost Freezes

Locking in all vendor and portal setup costs prior to launch, completely insulating the 46.47% operating margin from variable cost creep.

Risk Management Framework

Executive Call to Action

Capital Authorization

☐ Authorize the **$39,000** upfront capital allocation from idle cash reserves to secure site rental and portal setup.

Pricing Authorization

☐ Approve the introduction of the new **$1,500** corporate ticket pricing tier and uncapped pure donation options.

Pending approval, corporate sponsorship marketing campaigns will launch next week.
